Project Number: 2023-1-PL01-KA220-HED-000167212

AIM TO

The DialogEduShift project addresses the challenges posed by AI chat tools like ChatGPT in higher education, focusing on their integration and impact on student evaluation. With 65% of faculty unsure how to approach this issue, the project aims to empower teachers with skills to integrate AI tools; enhance education quality using AI for personalized learning; foster digital readiness and resilience in institutions; and develop a framework for evaluating AI tools' effectiveness and ethics. The project through its main results (WP2, WP3, WP4, and WP5) equips academicians with state-of-the-art knowledge on how to assess, provide feedback and work with the AI-generated content by the students.

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Education and Culture Executive Agency (EACEA).

🚀🎉 1st Transnational Partners Meeting Happened in Latvia! 🎉🚀 11 January 2024

We embark on a monumental journey that promises to reshape the landscape of educational dialogue and innovation. The DialogEduShift Project officially kicks off with an energizing and inspiring face-to-face meeting in the heart of Latvia. This event marks the beginning of a two-year journey dedicated to fostering transformative educational practices and collaborative learning environments.

Gathered in Latvia's vibrant setting, our team, along with esteemed educators, innovators, and change-makers, engaged in two days of intensive brainstorming, planning, and vision-setting. This kickoff meeting was not just a formal introduction but a celebration of the shared passion and commitment to making a tangible impact in the world of education.

Exciting Partnership Update Developing the "Handbook on Usage of AI-Language Models in Higher Education"

We are thrilled to share a significant update on our ongoing partnership aimed at integrating Artificial Intelligence (AI) into higher education. Together, we are focusing on Work Package 2 (WP2): the creation of a "Handbook on the Usage of AI-Language Models in Higher Education." This initiative is a cornerstone in our efforts to enhance the educational landscape by leveraging AI technology.

WP2 Objectives: Empowering Educators and Institutions

The primary goal of WP2, the Handbook for Academic Teachers, is to develop and deliver comprehensive educational resources for academic and Higher Education Institutions (HEI) providers. These resources are designed to tackle the current challenges associated with incorporating AI chat tools into teaching methodologies and evaluation strategies.
